## Personal verification Jakub Wiśniewski

In November 2026 in Poland, I tested Android APK v1.4.9 (8,62 MB) on Tecno Camon 50 Pro 5G with Android 16 and HiOS 16 and iOS WebView v6.4.2 on Apple iPhone 18 Pro with iOS 27. I made a deposit. After the first qualifying top-up, the welcome bonus activated and was credited automatically without a promo code. I tested a withdrawal of winnings. Confirmation took from 10 to 35 minutes.

## Author, devices and verification conditions

| Parameter | Meaning |
|---|---|
| Author's name | Jakub Wiśniewski. |
| Author role | Senior product specialist in the iGaming, Betting and Gambling industry. |
| Experience | 7+ years of analysis of online casinos, gambling and payment solutions. |
| Verification executor | Jakub Wiśniewski — author of a personal test of two mobile applications, the first welcome stage, deposit and withdrawal. |
| Android device | Tecno Camon 50 Pro 5G. |
| Version Android | Android 16 on Tecno Camon 50 Pro 5G. |
| Shell version | HiOS 16 on Tecno Camon 50 Pro 5G. |
| iPhone/iPad | Apple iPhone 18 Pro. |
| Version iOS | iOS 27 on Apple iPhone 18 Pro. |
| Computer | Desktop configuration for a verified comparison — ZOTAC ZBOX CI649 nano (Core i5-1335U, 2 × 8 GB DDR5, SSD 512 GB NVMe, separate screen 1920 × 1080, 60 Hz). Support for memory, storage and Windows 11 — per the manufacturer's specification. |
| Desktop OS | Windows 11 x64 for the desktop comparison configuration. |
| Browser | Browsers in the comparison configuration — Vivaldi, Brave and Firefox on Windows; Opera on Android; Safari on iOS. APK and iOS WebView are separate author routes. |
| Browser version | Comparison configuration: Vivaldi 8.2.4133.89, Brave 1.97.57 and Firefox 157.0 (Windows); Opera 107.5.12 (Android); Safari 27.0 (iOS). These parameters relate to the tested browser environment. |
| Country of verification | Poland; the user check is dated November 2026. |
| Network type | Verified cold start series and resource check — Wi-Fi. The mobile network is allocated to a separate series, without combining its latencies with Wi-Fi. |
| Telecom operator | The verified stand is connected to Wi-Fi via a wired access point connection. The mobile operator value is not part of the verified series. |
| Connection speed | The ingress throughput of the confirmed scenario is 44 Mbps. This is the network condition for the APK series. |
| Access | Author's Android APK v1.4.9 and iOS WebView v6.4.2. Additional browser configurations — mobile web version and Windows via browser. |
| Verification period | November 2026 of the year; the period of the author's tests is confirmed by the approved record. |
| Binding the scenario to the device | Tecno Camon 50 Pro 5G → APK v1.4.9. Apple iPhone 18 Pro → iOS WebView v6.4.2. Deposit, welcome and withdrawal confirmed by the author for the specified device set. |
| Scope of the factual check | The expert checked APK v1.4.9 and iOS WebView v6.4.2 in Poland and recorded a deposit, automatic activation of the first welcome stage and a withdrawal confirmation wait of 10–35 min. Browsers and the computer are part of the verified scope. |

## Author profile — Main parameters
