Multiple deposits and the real package size

Parameter	Meaning
Stage number	The PL package is split into stages No.1, No.2, and No.3 with separate crediting and separate calculation.
Stage sum	Confirmed scenario of equal qualifying top-ups — 80 PLN at each of the three stages.
Stage percentage	Stage 1 — 100%, stage 2 — 55%, stage 3 — 100% of the credited qualifying deposit.
Stage cap	For PL cards from 19.11.2026, each stage is limited to 2 500 PLN.
FS of the stage	Stage 1 — 150 FS, stage 2 — 100 FS, stage 3 — monetary accrual only. Total 250 FS.
Stage activation period	Each activated bonus is valid for 7 days under §4.9. This is the usage window of the received bonus. Admission to the next stage is tied to the deposit sequence and the status of the previous bonus.
Transition condition	The next stage corresponds to the following qualifying deposit. General §3.14 excludes the simultaneous activation of two deposit bonuses.
Stage bonus	For deposits 80 / 80 / 80 PLN cash bonuses 80 / 44 / 80 PLN.
Stage turnover	With a general 40× on the bonus amount and no special condition, the confirmed scenario gives 3 200 / 1 760 / 3 200 PLN. The total calculation 8 160 PLN does not combine the three separate requirements.
Deposit amount	80 + 80 + 80 = 240 PLN of own top-ups in calculating the lower bound.
Bonus amount	80 + 44 + 80 = 204 PLN of money across three stages in the confirmed scenario. The separate reward counter is 250 FS.
Effective accrual	204 / 240 = 85% cash accrual of the amount of own deposits in the confirmed minimum-deposit scenario. To reach all caps, the conservative pre-rounding benchmark at the second stage is 9 545,46 PLN total deposits, 7 500 PLN bonuses, 78,57% match.

Wagering, game contribution and progress

Parameter	Meaning
Multiplier	General rule §3.8 — 40×, unless a special offer sets a different multiplier. The saved card of the first EN/EUR stage indicates ×35 on the bonus; this indicator is stored separately from PL.
Base	In the confirmed scenario PL, the cash turnover base is the accrued 80 PLN of the first-stage bonus. AML turnover ×3 on the deposit amount is adhered to under a separate withdrawal condition.
Base size	The first-stage cash bonus base in the calculation is min(80 × 100%, 2 500) = 80 PLN.
Qualifying turnover	The general 40× condition yields 3 200 PLN of qualifying turnover at the first stage of the confirmed scenario. The ×35 multiplier is applied only when a special card is explicitly recorded.
Eligible game	For the calculation, 100% is taken from the regular permitted slot under §3.17. Gates of Olympus from §4.4 represents the assignment of FS, and its bonus counting is checked against the rules of the event and the game.
Game contribution	100% of paid stakes on permitted slots. A stake of 4 PLN with a contribution of 100% gives 4 PLN toward turnover; a stake of 4 PLN with a contribution of 10% gives 0,40 PLN.
Excluded game	Bonus Restricted Games limits eligibility for the specified title. For Instant Win and Jackpot Games under §3.20, zero credit is set; zero contribution is accounted for separately from the access restriction.
Maximum bet	In the absence of an exception, the maximum in PL is 20 PLN per slot bet and 40 PLN per live bet, including doubling and the cost of a purchased round (§3.6).
Minimum coefficient	The casino slot does not use a minimum sports odds requirement. A separate Sportsbook Welcome requires an accumulator of ≥3 events and ≥1,40 for each leg.
Crediting moment	The calculation counts the stake settlement for a completed eligible round; for the sports welcome §5.14–5.15 requires settlement, while void and Cash Out are not included in turnover.
Wagering already completed	In the example after 160 PLN eligible bets with a contribution of 100% and 40 PLN qualifying bets with a contribution of 10%, 164 PLN were counted.
Remaining to complete	3 200 − 164 = 3 036 PLN remained in the confirmed first deposit bonus scenario.
Remaining term	With confirmed accrual of 16.11.2026 in 12:00 CET and the checkpoint 19.11.2026 in 12:00 CET before the boundary 23.11.2026 12:00 CET, 4 days out of 7 remain. On the time scale CEST specified by the operator for accruals in §3.25, these marks correspond to 13:00.
Consequence of exceeding the rate	Bets above the limit fall outside the terms. §3.3 and §3.22 allow bonuses or winnings to be voided following a finding of breach.
Consequence of early withdrawal	For an early request of one's own funds, §3.12 provides for cancellation of the bonus and related winnings; payment of the remainder is permitted subject to cashier and verification conditions.

Cashback, rakeback and mutual deductions

Parameter	Meaning
Refund type	Weekly Cashback in slots, Weekly Sports Cashback and Rakeback — three calculations. In §7, Rakeback separately has instant, 7 and 30 days, while the visible Points Rakeback has a different periodicity.
Country and currency	The reproducible casino cashback calculation refers to the published rate EUR. The real-loss threshold 100 PLN is specified for PLN; the deposit EUR grid cannot be carried over to PLN.
Base	FAQ Weekly Cashback caps the calculation at the lesser of actual slot losses and the weekly deposit amount. The net deposit is explicitly stated for selecting the percentage. In the EUR scenario, the net amount is used to cap the base. Sports Cashback has separate terms.
Total bets	In the weekly example, completed self-funded bets in slots amounted to 800 EUR.
Winnings amount	In the same example, total payouts amounted to 580 EUR. Real net loss 800 − 580 = 220 EUR.
Excluded remedies	Bets/results on bonus money are excluded from real losses for Weekly Cashback and from the Rakeback base under §7.2.4.
Unsettled bets	The weekly calculation of the confirmed scenario counts completed rounds. In sports, §11 ties accrual to bet settlement; open coupons remain outside the completed series.
Percentage	The EUR grid indicates 5%, 6%, 8%, 10%, 12,5% and personally up to 25%. The published intervals leave fractional gaps between tiers and include 25 000 EUR in two tiers at once. At such boundaries, the rate from the account card applies. With a net deposit of 260 EUR, the first tier gives 5%.
Minimum deposit	The lower bound of the EUR tier is 20 EUR of net deposits for the week. Confirmed 300 EUR of deposits minus 40 EUR of pending or approved withdrawals give 260 EUR.
One deposit or the sum of several	The total net deposit for the week is used. A cancelled withdrawal is returned to the net deposits figure in accordance with FAQ.
Minimum losses	In the published list, the minimum real losses for PLN 100 PLN; in the EUR text, 20 EUR and 40 € appear side by side. The example with a loss of 220 EUR exceeds both EUR values.
Start of period	Casino: Monday 00:00 UTC of the previous week; in the example 09.11.2026 00:00 UTC. Sports Cashback — Monday 01:00 UTC.
End of period	Casino and sports — Sunday 23:59 UTC; in the example 15.11.2026. The confirmed scenario is calculated using the closed window.
Time zone	UTC for the weekly casino and sports cashback. In the Rakeback template for Sunday 12:00, CET is specified separately.
Cap	Casino EUR: cap 100 / 500 / 1 000 / 3 000 / 5 000 EUR by tiers and an overall ceiling of 25% of the weekly deposit. With gross deposits of 300 EUR, the limit is 75 EUR.
Previously paid refund	The calculation example does not include previous payouts for this week; previously accounted payments 0 EUR. Rakeback and cashback are tracked separately.
Deduction from base or accrual	Pending and approved withdrawals are deducted when determining the net deposit for tier selection. In the confirmed scenario, the same net deposit is used to check the base limit. Rakeback is calculated separately.
Order of cap and deductions	220 EUR of real losses in completed slots limit the base with a net deposit of 260 EUR. 5% × 220 = 11 EUR, below the limits of 100 EUR and 75 EUR.

Parameter	Meaning
Negative balance	In the weekly calculation, in the absence of an actual loss, the positive base equals 0 EUR. Such a result does not create a debt claim against the player.
Receipt period	Weekly Cashback is available for 72 hours from crediting after the weekly calculation. Under §7, Rakeback is available for 24 hours after accrual and lives for 24 hours after activation; 60 days refer to a different template.
Separate wager	Weekly Cashback has ×1 on accrual: with 11 EUR payouts, qualifying turnover 11 EUR. The Rakeback version with "No wagering requirements" is kept in a separate configuration.

Welcome package calculation PL

The expert reported that after the first minimum qualifying top-up in November 2026, the offer was activated and credited automatically. The expert's data relate to the first stage. The cards from 19.11.2026 set the conditions of the second and third stages and the total promotional amount.

Stage	Confirmed deposit	Money match / limit	Bonus at the lower limit	Free spins from the package	Turnover at 40× on bonus
First	80 PLN	100% / 2 500 PLN	80 PLN	150 FS	3 200 PLN
Second	80 PLN	55% / 2 500 PLN	44 PLN	100 FS	1 760 PLN
Third	80 PLN	100% / 2 500 PLN	80 PLN	0 FS	3 200 PLN
Amount of confirmed stages	240 PLN	7 500 PLN total limit	204 PLN	250 FS	8 160 PLN

With 80 PLN at the first tier and a zero starting balance, the monetary lines are 80 PLN of own balance and 80 PLN of bonus, totaling 160 PLN before play. The first package FS under §4.5 is issued at 50 per day for three days. The second is issued at 50 per day for two days. All monetary stages mathematically apply `min(депозит × доля, cap)`. The total 204 PLN amounts to 85% of 240 PLN deposits. The balances of each stage are accounted for separately.

Deposits up to each of the three thresholds amount to 2 500 PLN, ≈4 545,46 PLN rounded up to the cent, and 2 500 PLN. At these amounts, 7 500 PLN bonuses are obtained on 9 545,46 PLN deposits, or ≈78,57%. The 40× multiplier is specified in the general §3.8 in the absence of a separate condition. For the first stage, the saved EN/EUR card specifies ×35 on the bonus. In the monetary PL example, 160 PLN bets with a 100% contribution and 40 PLN with a 10% contribution give 164 PLN of credit and 3 036 PLN of remaining turnover. The separate AML turnover on the deposit is 80 × 3 = 240 PLN. The nominal value of 150 confirmed FS at 0,20 PLN is 30 PLN. With confirmed payouts of 18 PLN and 40× on the winnings themselves, the requirement is 720 PLN.

Weekly return and rakeback base

For the closed EUR-week 09–15.11.2026, the calculation assumes 300 EUR deposits, 40 EUR pending/approved withdrawals, and 260 EUR net deposits. From 800 EUR completed bets with own funds in slots and 580 EUR full payouts, 220 EUR real losses result. The confirmed scenario limits the base to the net deposit. This gives 220 EUR as the lesser of 220 EUR losses and 260 EUR net deposit. FAQ explicitly sets the net deposit for selecting the percentage. If "deposit sum" for limiting the base refers to gross 300 EUR, the final base is also equal to 220 EUR. The tier for 260 EUR sets 5%, therefore the accrual of 11 EUR is less than the tariff cap 100 EUR and the aggregate limit 75 EUR (25% of 300 EUR); even with a net base of the aggregate limit 65 EUR, the result does not change. At ×1, the turnover would be 11 EUR. The payout is available 72 hours after crediting under FAQ. The real-loss threshold 100 PLN applies to the PLN account.

In rakeback, the monetary stake volume, theoretical margin, and rank share are kept separate. With a confirmed stake of 20 EUR, a theoretical RTP 96%, and a return share of 10% for the selected verified tier, the result is 20 × (1 − 0,96) × 0,10 = 0,08 EUR. This is below the threshold 0,10 EUR for accumulated instant Rakeback from §7.2.1. The visible 18% Points Rakeback and the alternative "up to 25%" from FAQ refer to different versions of the terms.

Bonus

Where can I check my bonuses/Free Spins?

Go to the top-left corner, click on the button with three lines, and you will see "Bonuses" in the sidebar.

How can I activate my bonus?

Go to the Bonuses, select the bonus, and click "Activate".

On which games can I play with my bonus?

Unless otherwise stated, all bonuses have 'Standard Wagering' terms, meaning that you can place bets on Slots games. It's important to note, however, that eligible games may differ from one offer to another, so we recommend you review our Bonus Policy by clicking here to avoid any confusion.

What's the difference between real money and bonus money?

Real money is your own deposited cash, while bonus money comes with wagering requirements before it becomes withdrawable.

While you have real money on balance, the bonus won't be wagered, and any winnings will be credited as real money. Bonus wagering will begin when you start playing with the bonus part after all the real balance is played.

What is wagering, and how do I wager a bonus?

It is a condition that specifies how much you need to bet in order to withdraw any winnings earned using the bonus money. It is usually represented as a multiplier, along with a timeframe that you have to meet the requirements within, or you risk losing your bonus funds.

How do I convert bonus money into real money?

To convert your bonus money into real-world money, you need to complete the wagering requirements. Here’s how it works: You must place bets totaling X times the amount of your bonus. It doesn’t matter if your bets win or lose—just placing the bets counts toward the requirement. You start by playing with your real money, and then your bonus funds are used. Once you finish the wagering, your bonus winnings become withdrawable. If you cancel the bonus before completing the wagering, both the bonus and any winnings associated with it will be lost. Different game types contribute differently to bonus wagering: Slots - 100%, Bonus Buy games - 50%, Live - 10%, Instant win - 5%. You can always check your progress by visiting the Bonuses.

How do I delete a bonus?

Go to the Bonuses and click "Cancel". If you cancel a bonus after starting to play with it, both the bonus and any winnings associated with it are lost and cannot be restored.

How do I get a bonus code?

Bonus codes are provided by affiliated partners prior to registration. After that, all available promo codes will be sent directly to your verified email, unless you have unsubscribed.

Can I restore my expired bonus?

If the bonus wasn't used at all and expired within the last week, please contact Support for help.

How can I get Cashback?

Your Cashback percentage depends on your total deposits from the previous week and is calculated based on your real losses during that period. If your deposit amount is lower than your total losses, the Cashback will be calculated from the deposit amount.

You will receive Cashback after it has been calculated. Cashback is calculated based on the loss amount (or equivalent) starting from the previous week, from Monday at 12:00 AM (UTC) to Sunday at 11:59 AM (UTC) in slot games only.

Frequently Asked Questions

When do I get Cashback credited?

You will receive Cashback after it has been calculated. Cashback is calculated based on the loss amount (or equivalent) starting from the previous week from Monday at 12:00 AM (UTC) to Sunday at 11:59 PM (UTC) in slot games only.

What are the Cashback percentages?

Your Cashback percentage depends on your deposit sum for the previous week and is calculated from your real losses sum for the previous week. If your deposit sum is less than the real losses sum for the previous week, Cashback will be calculated from the deposit sum. The Cashback percentage according to deposit sums works as follows:

- €20 - €1,000, 5% max €100
- €1,001 - €5,000, 6% max €500
- €5,001 - €10,000, 8% max €1,000
- €10,001 - €25,000, 10% max €3,000
- €25,000+, 12.5% max €5,000
- Up to 25% - Invite Only

What's my maximum Cashback?

The total amount of received Cashback cannot exceed 25% of the total deposit amount of the previous week, and is limited according to your Cashback Level as shown above. Some players have personal deals, which are based on an agreement with their VIP Manager.

Wager Requirement?

All Cashback comes with a 1x wagering requirement.

How is my Cashback percentage calculated?

The Cashback percentage is calculated from the net deposit amount (i.e., deposit amounts minus pending and approved withdrawals). If the withdrawal is cancelled, it will be summed up again to the deposit amount.
