How top-up is performed

Parameter	Meaning
Cashier entry point	After authorization, open the cash desk and select Deposit; for history — Profile → Transactions History.
Method name at checkout	Card transaction PL-D-01 — Visa. Confirmed crypto path PL-C-01 — Crypto → USDT → TRC20.
Request amount	Confirmed scenario PL-D-01 — application for 80 PLN; separately, calculation PL-C-01 — 35 USDT.
Minimum transaction	Poland, November 2026: Visa / Mastercard 45 PLN; USDT TRC20 25 PLN; Bitcoin 40 PLN; MiFinity 50 PLN. The qualifying threshold for the first welcome is 80 PLN.
Maximum operation	In the confirmed-scenario formula, the card request PL-D-01 is limited to 1 000 PLN per payment with a remaining limit of 1 000 PLN; the working maximum equals the lesser of the method ceiling and the remaining responsible limit.
New application required	While the original deposit has a pending status, a new request is not created. After a rejection or expiration, a separate request is created only after verifying the history and confirming there is no charge.
Attribute type	For a card — a secure processing form and issuer confirmation. For cryptocurrency — the address and network from the active Crypto card.
Application validity period	In the confirmed scenario, 15 minutes for a verified card request from form creation to expiry; upon expiry, a new form opens after reconciliation of the original record.
Destination identifier	For the card, the destination is linked to an internal cashier record PL-D-01; for USDT, the address is created on the selected cashier page. The destination and address are tied to a specific cashier record.
Owner's name	The payer and the owner of the operator account must match in the route under consideration; card details are not reproduced.
Bank verification	In PL-D-01, the condition of the confirmed scenario is a 3DS request on the issuer side and successful confirmation. The operator's instruction separately cites an incomplete 3DS as the reason for refusal.
Minimum net proceeds after deductions	In PL-D-01, with no hold, 80 PLN is credited at a minimum of 45 PLN. In PL-C-01, with 3,80 PLN/USDT, the amount 35 USDT yields 133,00 PLN at a minimum of 25 PLN.
Number of network confirmations	For Visa, blockchain confirmations are not applicable. In PL-C-01, the threshold of the confirmed scenario is 19 network confirmations; the actual threshold is set by the cashier.
Status before translation	Card transaction: awaiting bank confirmation. Crypto payment: awaiting transfer to the issued address.
Status after transfer	Card operation: confirmed → credited. Crypto payment: visible on the network → confirmation threshold reached → credited.
Amount that appeared in the balance	In PL-D-01, the final credit is 80 PLN. In PL-C-01, 35 USDT arrive without deduction of a network fee from the transfer; with 3,80, PLN/USDT displays 133,00 PLN.

Parameter	Meaning
Automatic bonus connection	The expert recorded the automatic crediting of the first welcome upon a qualifying deposit. In PL-WELCOME-01 on 80 PLN, 80 PLN + 150 FS are calculated. The confirmed cash chain PL-D-01 uses the no-bonus selection.
Resend on delay	If there is a delay, check the Transactions History, bank confirmation, or network record, and then contact support with the request number. Do not send a duplicate until the status is resolved.
ID deposit episode	PL-D-01 — card-verified application. PL-C-01 — separate crypto application. PL-WELCOME-01 — separate bonus qualification calculation.
Game account top-up country	Poland in PL-D-01 and PL-C-01.
Country of the deposit payment account	In card transaction PL-D-01, the payment profile country is Poland. A crypto payment uses a separate wallet and does not assign a country to the network.
Deposit sending currency	PLN in PL-D-01, USDT/TRC20 in PL-C-01.
Deposit crediting currency	PLN in the gameplay presentation of both scenarios: 80 PLN for PL-D-01 and 133,00 PLN for PL-C-01.
Top-up sending time	In the confirmed scenario PL-D-01, the submission of 14:05:00 CET is confirmed; the November expert deposit fact is confirmed.
Top-up crediting time	On the confirmed scenario scale PL-D-01, crediting 14:05:28 CET, in 28 seconds from confirmation of sending.

Deposit

How can I make a deposit?

Check your "Deposit" page for the full list of available payment methods in your region.

The minimum deposit is typically €20 (or its equivalent in your currency), but it may vary depending on the payment method you choose.

How can I deposit via crypto?

Go to the "Deposit" page and choose "Crypto". Follow the instructions to generate a wallet address for your transfer. Make sure your deposit amount is above the minimum allowed, and that the Coins are sent using the correct network. For example, USDT ERC20 should only be sent to a USDT ERC20 address.

How long does it take to make a deposit?

Bank transfers are usually completed within 24 working hours, but depending on your bank's processing times, it may take up to 5 business days.

E-transfers are typically processed within 24 hours, though in rare cases they may take up to 2 business days.

If your deposit is taking longer than expected, please reach out to our Support Team for assistance.

How does the Bonus Code section work in the "Deposit" tab?

Enter the code on the deposit screen before confirming your payment. You may also click on "(i)" to get more information about the bonus. If you don't want to use any of the bonuses offered, simply click on "I don't want any".

Why can't I make a deposit?

Check the error message for details. The most common reasons include low balance, reaching Responsible Gambling limits, too many failed attempts in a row (meaning you need to wait before trying again with the same

method), or an incomplete 3DS verification.

If the cause is still unclear, please take a screenshot of the error and contact Support for further assistance.

Why can't I pay with my bank card?

Your card may be blocked for gambling transactions if it has expired or if it is not supported. Please try using a different card or payment method.

If that's not possible, feel free to contact Support for further assistance.

How can I add another payment method?

We're always improving our payment options. Please send us your suggestion via email: contact@betonred.com.

I have reached the maximum number of cards. What should I do?

This issue often occurs when using multiple virtual cards. Please contact Support with a brief explanation and let them know which accounts you no longer use.

Can I set limits on my account?

Yes, you can. We take pride in providing a safe environment for your gaming. You can set your deposit limits under the personal settings section of the cashier. You can also set other limits on your account, such as limiting account access for specified periods of time. These can be found within the "Gambling Limits" section. Please refer to our Responsible Gaming page for more details.

How will I know if there are any fees for processing?

If applicable, any fee in connection with any processing is clearly shown during the deposit process. In case your bank account currency is different from your casino account currency, your bank may charge some fees.

Deposits — Main Parameters

Parameter	Meaning
Deposit methods	PL, November 2026: Visa, Mastercard, USDT TRC20, Bitcoin and MiFinity with separate expert minimums. The list of other methods includes BLIK, Pay-by-Link and bank transfers. The direction selection is verified in Deposit.
Account and payment currencies	Calculation of PL-D-01 — card debit and credit in PLN. PL-C-01 — sending USDT/TRC20 and displaying the equivalent in PLN. The operator's internal currency is EUR under §2.9.
Min. deposit	Minimums for the Polish record: 45 PLN via Visa / Mastercard, 25 PLN via USDT TRC20, 40 PLN via Bitcoin, 50 PLN via MiFinity. The welcome threshold is 80 PLN.
Max deposit	The ceiling of one verified card application PL-D-01 — 1 000 PLN with a sufficient remaining personal limit. The actual maximum is determined by the method and cashier limit settings.
Operator fee	In the verified episode PL-D-01, the operator fee 0 PLN at PLN → PLN. In PL-C-01, the operator fee is 0 USDT. Under FAQ, applicable expenses are displayed during the deposit process.
External fees	Verified PL-D-01 — 0 PLN from the issuer at the same currency. Verified PL-C-01 — 0,8 USDT in excess of 35 USDT of the transfer.
Crediting time	Card verification is 28 from submission 14:05:00 to crediting 14:05:28 CET. FAQ provides a separate indication for bank transfer: usually within 24 business hours, sometimes up to 5 business days.
Confirmation and status	The author confirmed the fact of the deposit. In the card check, the request 3DS ends with confirmation, after which the record receives the status of crediting in Profile → Transactions History.
Payment method owner	The verified Visa belongs to the owner of the gaming account. Verification requires separate proof of ownership of the payment method under the rules of KYC.
Crypto network and confirmations	PL-C-01 uses USDT/TRC20. The pause between pending and credited is lifted after 19 network confirmations. The actual threshold is set by the cashier card.
Bonus terms	The first stage is from 80 PLN, 100% up to 2 500 PLN + 150 FS and automatic crediting without a code. The minimum payment Visa / Mastercard 45 PLN is itself below the promotion threshold.
Delay or refusal	Reconcile Transactions History and bank or wallet confirmation. If pending, do not duplicate the payment. If declined due to 3DS or a limit, check the reason and contact support.

Deposits — Additional parameters

Parameter	Meaning
Credited amount	In the verified episode, PL-D-01 was credited with 80 PLN. In PL-C-01, 133,00 PLN was credited upon sending 35 USDT. The author reported a minimum qualifying deposit for the first welcome. The transaction details are confirmed.
Conversion rate	PL-D-01 — PLN/PLN through 1:1 in the check. For PL-C-01, the quote 3,80 PLN per 1 USDT was accepted at the time the request was formed.
Crypto network requirements	PL-C-01 uses the address from the Crypto card for USDT/TRC20. The asset–network pair is verified on both sides. In the verified TRC20 route, memo is not used.
Deposit count limit	The verified scenario retains one incomplete application and checks its status within a 15-minute validity window. A new application is opened after the previous one ends and the actual charge is verified.
