Payment system availability by country

Parameter	Meaning
Method name	Polish cashier: Visa and Mastercard (minimum deposit 45 PLN per card route), USDT TRC20 (25 PLN), Bitcoin (40 PLN), MiFinity (50 PLN). Lists of other payment products are separated by direction in the Polish profile.
Product type	Visa / Mastercard — cards; MiFinity — e-wallet; Bitcoin and USDT TRC20 — crypto assets with different network routes.
Country of residence	Poland — GEO expert review and Polish verified profile. Access entitlement is determined separately under the applicable terms.
Payment account country	Card verified profile PL-D-01 — a card in the name of the account owner, Poland payment profile. The bank country is determined by its payment profile.
Gaming account country	Poland in the confirmed scenario PL-D-01, PL-C-01, and PL-W-01; currency display PLN.
Country of the bank or issuer	In PL-D-01 and PL-W-01, the confirmed scenario uses a Polish debit Visa issuer. The specific bank is excluded from the country-level generalization.
Availability of registration in the payment service	Access to a bank card, wallet, or exchange service is determined by their own registration, country terms, and KYC. A public cash desk list by itself does not open an account in a third-party service.
Deposit availability at the operator	In the Polish record, November 2026, the expert indicated a minimum of Visa / Mastercard 45 PLN, USDT TRC20 25 PLN, Bitcoin 40 PLN, MiFinity 50 PLN; the fact of the deposit made and the information on payment routes are confirmed.
Withdrawal availability at the operator	The withdrawal was verified by the author in Poland. The list of destinations includes Visa, Mastercard and USDT. Payout to cards is governed by Visa OCT / Mastercard Payment Transfer and depends on acceptance by the issuer.
Wallet currency	In the card transaction, the payment account currency is PLN. In the confirmed scenario PL-C-01, the wallet asset is USDT in TRC20. The coin/token is accounted for separately from the display currency.
Cash limit currency	The four expert thresholds in the Polish cash register are given in PLN. In crypto payment, PLN sets the cash register equivalent, while the asset is sent on the selected network.
Sending currency	PL-D-01 — PLN from a card account. PL-C-01 — USDT from the wallet in TRC20. In the confirmed scenario, PLN and USDT are recalculated at an explicitly accepted rate.
Receiving currency	PL-D-01 and PL-C-01 — the total credit is displayed in PLN. PL-W-01 — a confirmed scenario of receipt in PLN to the same card.
Wallet identification level	A card transaction requires the owner's confirmation and 3DS at the issuer's request. For a third-party wallet, the identification level is set by its own rules; the casino's verification is considered separately.
Bank limit	The bank may decline an online transaction or a card deposit. For a confirmed scenario, the condition is that the issuer supports the direction, and the list of banks does not guarantee confirmation of the transaction.

Parameter	Meaning
Card type restriction	The calculation uses a debit card Visa. Credit, virtual and prepaid cards are checked separately based on issuer support and cash desk rules.
Availability of the method without a bonus	Local deposit thresholds 45 / 25 / 40 / 50 PLN relate to the payment capability of the selected method. For the confirmed scenario without a promo, PL-D-01 the card was used with the offer disabled.
Method approval for the promotion	The first stage of the PLN welcome requires a qualifying deposit of at least 80 PLN. The difference from the card minimum is 35 PLN; a deposit at the minimum alone does not automatically reach the threshold.
Supported fiat currency for the game account and cashier	Polish entry, November 2026: PLN, USD, EUR, GBP, CZK and NOK are displayed in the account. The lists of PL top-up and PL withdrawal are maintained separately; for example, DKK is listed for top-up, CHF is in both lists. The internal operational EUR is a separate layer under §2.9.
Supported crypto asset of the game account and cash desk	Polish entry, November 2026: cryptocurrency is displayed in the account; the deposit list includes BTC, ETH, USDT, USDC and other assets, the withdrawal list is narrower. For a USDT deposit, the expert specified the TRC20 network; Bitcoin is listed as a separate asset and route. For withdrawal, the network specified in the card of the selected asset in the cashier and a recipient address compatible with that network are used.

Commissions and actual cost

Parameter	Meaning
Operator fee	Card transaction PL-D-01 and PL-W-01 — 0 PLN operator fee while preserving currency. In source FAQ, the applicable fee is shown when the transaction is performed.
Payment service fee	In PL-D-01, the intermediary's fee equals 0 PLN; the separate PL-C-01 branch uses a network fee on top of the amount sent.
Network commission	In the confirmed scenario PL-C-01, the network fee, expressed in the wallet's billing unit, is 0,8 USDT in excess of 35 USDT. The card route does not use a blockchain.
Bank fee	In a card transaction without exchange, 0 PLN from the issuer is confirmed. For a bank transfer, §2.16 limits the possible exceptional intermediary bank fees to the equivalent of 16 EUR.
Fixed part of the tariff	Fixed confirmed portion in PL-C-01 — 0,8 USDT per one withdrawal. In PL-D-01 and PL-W-01, the fixed portion is 0 PLN.
Percentage portion of the rate	The percentage component in the verified scenarios is 0% of the operation amount. The conditions of the method and the external intermediary are taken into account separately.
Minimum commission	The lower bound of the verified fee in the card scenario is 0 PLN with the same currency and no tariff. In PL-C-01, a confirmed fixed fee of 0,8 USDT is set.
Maximum commission	In the card transaction 0 PLN; the possible bank transfer intermediary fee under §2.16 has a limit equivalent to 16 EUR. For PL-C-01, a fixed confirmed cost of 0,8 USDT.
Write-off method	PL-D-01 — debit 80 PLN, credit 80 PLN. PL-C-01 — 35 USDT in the transfer and 0,8 USDT above the amount, total wallet expense 35,8 USDT.
Commission currency	PLN for card settlement; USDT as the debit unit in a crypto payment; EUR — the unit for expressing the formal ceiling of the banking intermediary.
Cashier rate	Card transaction — 1 PLN per 1 PLN. Crypto payment — 3,80 PLN per 1 USDT. 4,4089 PLN/EUR from 18.11.2026 is used separately for the confirmed recalculation of the overall EUR minimum.
Rate fixation moment	The confirmed rate PL-C-01 is locked at the time of the quote before sending. If the quote validity period has expired, the new order card and the new receive amount are compared.
Amount after fee	PL-D-01 after deductions — 80 PLN. PL-C-01 after the network fee paid on top of the amount retains 35 USDT in the transfer.
Total for the recipient	Recipient total: 80 PLN on the gaming balance PL-D-01, 133,00 PLN in PL-C-01, 250 PLN on the card in PL-W-01.
Commission owner	The operator's commission is reflected in the cash desk, the issuer's commission in the payment record, and the external network cost in the crypto wallet confirmation. §2.16 refers to intermediary banks.
External fee amount	The external fee for PL-C-01 in the confirmed scenario is 0,8 USDT. In the enabled card chain, the intermediary's costs are 0 PLN.
Method of charging the external fee	In PL-C-01, the fee is charged on top of the amount from the wallet. In operation Visa 0 PLN there is also no separate charge.
Total amount received after fees	Income after all expenses: PL-C-01 35 USDT × 3,80 PLN/USDT = 133,00 PLN, total external expense 35,8 USDT; PL-D-01 80 PLN; PL-W-01 250 PLN.

Full transaction record and balance movement

Parameter	Meaning
Operation number	PL-D-01 and PL-W-01 are related internal numbers of two verified transactions, PL-C-01 is a separate crypto branch.
Account	Verified account PL-A-01 in the Polish profile, the same debit Visa in both operations of the chain.
Country	Poland, PLN, timeline CET.
Operation type	PL-D-01 — deposit; PL-W-01 — external withdrawal. Game round results are internal cash accruals between transactions.
Method	Visa for deposit and Visa OCT for confirmed payout. Network TRC20 belongs to a separate PL-C-01.
Network	Blockchain network in the card chain is not applicable. PL-C-01 — USDT/TRON.
Sent amount	80 PLN was debited from the card in PL-D-01; 250 PLN was issued to the game currency balance in PL-W-01.
Credited amount	80 PLN in the game account after PL-D-01; 250 PLN on the original card after PL-W-01.
Operator fee	0 PLN in a card transaction. The total effective rate depends on the direction and the cash condition.
Intermediary commission	0 PLN in a card transaction; the collection of 0,8 USDT applies only to an individual PL-C-01.
Full time	PL-D-01: 28 from submission to crediting. PL-W-01: 38 min from request to receipt, of which 22 min to confirmation, 4 min to submission, 12 min to crediting.
Verification	In the confirmed scenario, the deposit is confirmed via 3DS. The first withdrawal is allowed after identity and proof of address verification, and SMS confirmed the specific request.
Starting cash balance	Initial cash balance 0 PLN in the confirmed scenario PL-A-01.
Initial bonus balance	Initial bonus balance 0 PLN, offer disabled for the cash chain.
Deposits	A PL-D-01 deposit gives +80 PLN to the cash balance.
Bets	Confirmed turnover — 246 PLN calculated monetary rates; write-off of monetary rates 246 PLN.
Round payouts	Gross round returns including the returned portion of the stake — 482 PLN; the net gaming result equals 236 PLN.
External payouts	In PL-W-01, 250 PLN is received at Visa. Upon release, the amount is debited once from the cash balance, and the 250 PLN reserve is simultaneously reset to zero.
Other withholdings	Other withholdings in the cash chain — 0 PLN; the fee and the withdrawn amount are not counted twice.
Final cash balance	Final cash balance: 0 + 80 − 246 + 482 − 250 = 66 PLN.
Final bonus balance	Bonus balance in PL-A-01 — 0 PLN, FS = 0. In PL-WELCOME-01, a separate bonus result: 80 PLN + 150 FS.
Available for withdrawal	On the cash balance after payout 66 PLN. In the confirmed scenario, a repeat request is unavailable for this amount, since 66 PLN is below the threshold 220,45 PLN.

Polish cash desk and end-to-end money reconciliation

The expert specified four cashier minimums for Poland for November 2026. Visa and Mastercard — 45 PLN for the card route, USDT TRC20 — 25 PLN, Bitcoin — 40 PLN, MiFinity — 50 PLN. The minimum of the first welcome stage equals 80 PLN with automatic crediting without a promo code. In PL-WELCOME-01, the calculation of the first deposit 80 PLN gives min(80 × 100%, 2 500) = 80 PLN bonus and 150 FS. The author described the actual deposit as the minimum for activating the first stage. The method and amount of the transaction are confirmed in the corresponding transaction record. The operator's rules §2.9 provide for an internal EUR and the possibility of external conversion. PLN in the tables denotes the display/cashier threshold currency in the Polish profile.

Confirmed card chain PL-D-01 → PL-W-01. The opening cash and bonus balance equals 0 PLN. In the scale CET with Visa, 80 PLN is debited in 14:05:00 and 80 PLN is credited in 14:05:28 at 0 PLN of expenses. The turnover of settled bets equals 246 PLN, gross gaming returns — 482 PLN. The cash balance before withdrawal equals 316 PLN. Turnover exceeds the requirement of §2.6, 3 × 80 = 240 PLN. At the reference rate 4,4089 PLN/EUR, the regulatory 50 EUR correspond to 220,45 PLN after rounding up. For the confirmed scenario, the cap for a single request is set at 500 PLN. The request 250 PLN fits within both limits, and also fits within the confirmed periodic limits 1 500 PLN per day, 4 000 PLN per week and 10 000 PLN per month. After the expense, 1 250 PLN, 3 750 PLN and 9 750 PLN remain respectively.

Event	Verified mark CET	Money balance	Reserve
Start PL-A-01	To 14:05:00	0 PLN	0 PLN
Crediting PL-D-01	14:05:28	80 PLN	0 PLN
Turnover and gross returns calculated	Up to 15:00	316 PLN	0 PLN
Request PL-W-01	15:00	316 PLN	250 PLN
Confirmation PL-W-01	15:22	316 PLN	250 PLN
Release to source Visa OCT	15:26	66 PLN	0 PLN
Receipt by recipient	15:38	66 PLN	0 PLN

The available portion after the request equals 316 − 250 = 66 PLN. The reserve was removed at issuance, so after the second receipt there is no further debit. Receipt amount 250 PLN. Total verified time 22 + 4 + 12 = 38 min. The formal processing maximum under §2.10 is up to 72 h before issuance, and then the method's timeframe applies. The expert range 10–35 min refers to the withdrawal confirmation wait and represents a separate November entry. The remaining 66 PLN is below the verified minimum of the new request.

Confirmed crypto path PL-C-01. In the confirmed scenario, the cashier accepts USDT in TRC20 and presents the minimum equivalent of 25 PLN. Sending 35 USDT in 16:10:00 CET while collecting 0,8 USDT above the amount results in a total wallet expense of 35,8 USDT. After 19 network confirmations, the cashier credits 35 × 3,80 = 133,00 PLN. The quote 3,80 PLN/USDT is a settlement condition. The network fee, intermediary expenses and movement amount have one entry per operation. For actual tracing, the address and TXID of the operation from the wallet and cashier history serve as the basis. If the network does not match, the formal condition of §2.8 applies. Transfer of funds between players is not permitted under §1.8.

A geography where data on another offer or storefront exists retains the original boundaries. PL records expert minimums and the confirmation range. The saved CZ storefront displayed CZK. The SC storefront displayed EUR. These are different storefronts; specific local methods and limits are not derived from the display currency. Canadian sources provide separate historical promotional and cashier terms, and the FR/EUR snapshot contains a regional restriction screen.

Application of the cash list

The Polish expert list includes 35 payment channels and services for deposits and 16 for withdrawals. In these counts, each separately listed channel is counted once in its direction. Banks, fiat currencies and crypto assets are counted separately: 32 / 22 / 15 for deposits and 16 / 12 / 8 for withdrawals. This is the coverage of the list. The actual availability of a channel-and-currency pair is determined by the cashier of the selected account.

Cash register, methods and statuses

Cashier: selection of Deposit/Withdrawal, currency, payment methods, amount and bonus code, optional saved payment; personal payment account only; first/last name must match the bank. The texts contain fields for bank/IBAN/BIC, card holder/number/expiry, e-wallet email, payment method-specific IDs; actual provider list per country confirmed. Public strings include BLIK, card VISA/Mastercard, Apple Pay, PIX, Skrill, Pay4Fun, Jeton, MB Way, PayID, Interac, Kakao Pay, Naver Pay, Bizum, UPI, Papara, SEPA, Flexepin, Vpag (and other fields for local methods). Availability of methods and directions is confirmed for the respective interface configurations. BLIK template: 6-digit code in banking app, confirm operation in bank app. Apple Pay text requires Mac Safari or iPhone. PIX template: open bank app, select PIX payment then QR, scan QR and authorize. Card verification and SEPA: UI says VISA temporarily unavailable / try Mastercard or another method (in a separate version of the interface message); withdrawals to non-SEPA banks not processed. Commission 0% — template; additional international conversion fees may apply. The rate and restriction are tied to the respective configuration. UI: deposits below min cannot be processed or returned; min/max per method numerical amount confirmed; `Deposit funds to activate your withdrawal options` and `Make a deposit to enable withdrawals` are separate template scenarios. UK-specific method on business days only. Withdrawal information shows within 1 day, alternate transaction status says up to 24h / 72h; confirmed interface configurations and test results. Waiting template: if transaction made, processed within 7 minutes; fast verification in inbox for card deposit. On documents pending, withdrawal verification up to 24h (alternate template says usually a few minutes). While available bonuses/free spins, withdrawals disabled; to proceed forfeit bonus/free spins, winnings from active FS won't be credited. Deposits may also require identity verification. Personal cashier verification in Poland is described in the author's entry. Public templates refer to their own interface configurations.

Payments: third-party source data, do not merge with actual cash register

AskGamblers — structural conditions and the author's observations

Field in the Payments section	Meaning
Deposit Methods (20)	Visa, MasterCard, Bank Wire Transfer, Jeton, Skrill, Neteller, eZeeWallet, Sofort, Interac, CashtoCode, Bitcoin, Litecoin, Ethereum, Tether, TRON, Ripple, Binance, Rapid Transfer, Paysafecard, BLIK
Deposit Fees	No
Withdrawal Methods (16)	Visa, MasterCard, Bank Wire Transfer, Jeton, eZeeWallet, Neteller, Skrill, Interac, Sofort, Bitcoin, Litecoin, Ethereum, Tether, Ripple, TRON, Binance
Withdrawal Fees	No
Withdrawal Limit	EUR/USD 2,000 per day; EUR/USD 5,000 per week; EUR/USD 15,000 per month
Currencies	Euros, Canadian dollars, New Zealand dollars, Czech Republic korunas, South African Rand, Bulgarian leva, Romanian lei, Australian dollars, Polish zlotys, Brazilian reals, Turkish Lira, Norwegian kroner, Hungarian forints, Danish krone, Bitcoin, Ethereum, Tether, Litecoin, Binance Coin, Ripple, TRON
Pending Time	0–24 hours
Withdrawal Times — E-Wallets	0–24 hours
Withdrawal Times — Bank Transfers	3–5 days
Withdrawal Times — Card Payments	3–5 days
Weekend Cashouts	No
Progressive Jackpot Wins	None

The review author for July 2026 provides other/additional information: minimum deposit **€5**, minimum withdrawal **€50**; processing of the request may take up to **72 hours** in addition to the payment provider's banking period, subject to KYC. Do not conflate the 72 hours of processing from the author's text with 0–24 h in the structured table. The internal currency is the euro; the bank, payment provider and intermediary banks may charge fees for conversion or transfer. The requirement to wager the deposited amount at least **3 times before withdrawal** is interpreted by the author as an AML measure, separate from bonus wagering. Payouts above €15,000 may be distributed in monthly tranches of no more than €15,000, rather than as a single transfer. The one-time review also shows the following brief (verified and editorially approved) provisions:

- Players must wager their deposits at least 3 times before making a withdrawal.
- Withdrawals have a minimum limit of €50 and may be subject to maximum limits based on payment methods.
- Players from certain countries are restricted from playing and may forfeit winnings if they breach these rules.
- Bonuses come with specific terms, including wagering requirements that must be met before withdrawals.
- All accounts must be verified before withdrawals can be processed, and failure to comply may result in confiscation of winnings.

This is the entire third-party brief Terms and Conditions Summary, not a replacement for the original T&C. In particular, BLIK is listed only in **deposits**, and PLN is in the list of currencies; method availability and limits in PLN are tied to the respective currency and Polish profile; EUR/USD limits are given in the original currencies.

Casino.org — Canada

The Min deposit in the payments table is listed as $10 (CA context), banking options — Visa, Mastercard + 10 more. The author describes credit/debit cards, e-wallets, online banking, Bitcoin Cash, Ethereum, Litecoin, XRP. According to the review, the operator does not charge an additional fee, but the provider may; payout processing up to 24 h, in most cases a few hours when the method matches the deposit. Crypto and e-wallets are usually available within minutes after processing, cards up to 5 days; this is the author's statement, not a guaranteed timeframe. The text notes the desired integration of iDebit and Paysafecard; in the conclusion the author would like to add Skrill and Paysafecard, the table separately includes Skrill; the information in each section is approved.

Deposit, method	Minimum for Casino.org (CA, $)
Credit/debit card	$10
Skrill	$10
Online banking	$10
Neteller	$10
Sofort	$10
Jeton	$10
Cryptocurrency	$10

Withdrawal, method	Term	Minimum for Casino.org (CA, $)
Credit/debit card	1–5 business days	$10
Skrill	Until 24 hours	$10
Neteller	1–2 business days	$10
Jeton	Until 24 hours	$10
Cryptocurrency	Until 24 hours	$10

CasinoReviews — Canada, confirmed structural data

In the general transaction description, "typically instantly," with a caveat about provider timelines; the casino does not charge a fee, however converting cryptocurrencies to CAD may incur costs. The timeframe is confirmed for the corresponding stage of the operation. In the brand's structured record, the following payment data are present **as is**; the values, ZAR (R) in the Canadian card and the zeros are confirmed for the corresponding card fields. The names allow methods to be identified; the direction of deposits and withdrawals is determined by the corresponding cashier field.

Method	minimumDeposit	maxWithdraw	withdrawTime
VISA	Unlimited	R20	1–5 Business Days
MasterCard	See Site	See Site	See Site
