Editorial, contacts and data handling

Parameter	Meaning
Responsible publisher	Editorial project domain betonredopinie.com. The approved configuration assigns release and correction of materials to the editorial team, and content and public communication with the reader to the author Jakub Wiśniewski.
Editorial contact	Jakub Wiśniewski, jakub.wisniewski1@gmail.com, editorial questions about the material, edits, and sources.
Personal data contact	Requests to the editorial team regarding personal data are sent to the same addressee with the subject "Dane osobowe". Game account operations are handled by the operator.
Commercial relations	Basic editorial site publication order: independent review without paid placement and active affiliate links.
Contact form	Project contact form: name (optional), reply email (required), subject or category (required), description of the request (required), and a checkbox confirming familiarity with the processing terms.
Form recipient	Recipient of the project form — the editorial team represented by Jakub Wiśniewski. Attachments and gaming account details are not part of the form.
Consent	Project text near the submit button: "I have read the data processing rules for responding to the request." The checkbox is separate and empty by default. There is no marketing subscription.
Comments	Comments on publications are excluded from the first edition of the site; feedback goes through private correspondence.
Editorial site account	The editorial version is open for reading without registration or a personal account.
Analytics	The project configuration has no analytics trackers. Technical operations rely on separate error and access logs.
Cookies	In the project, a session form cookie is permitted to protect submission. Its lifetime is until the end of the session or 30 minutes of inactivity. Analytics and advertising cookies are disabled.
Email copies	The project's email copy of the request is stored in the working mailbox for up to 90 calendar days from the registration of the request, taking into account legal holds for the specific complaint.
Storage of requests	The project record of the request in the working register is stored for 90 calendar days from the first registration; a repeat response does not extend the period.
Logs	Technical web access and error logs — up to 14 calendar days from the event. The full message text and game password are not recorded in the logs.
Backups	The backup project cycle is 30 calendar days from backup creation. Deletion from the working database is applied upon restoration before access is opened.
AI assistant	The public AI assistant is excluded from the editorial configuration. The response to the request is provided by the editorial team.
AI history on the site side	There is no history of AI dialogues as part of the editorial site. Storage of form messages is described separately.

Parameter	Meaning
Function status	The form, mail route, logs, backups and deletion are described as release design parameters. The author's published channel is defined by an expert entry.
Rights holder of the editorial website	Designation of the editorial project — BetOnRed Opinie. Rights to original materials are reserved by the authors or the rights holder specified in the publication.
Editorial team and roles	Author and public contact: Jakub Wiśniewski, senior specialist in iGaming, Betting and Gambling, 7+ years. The editorial team handles edits and requests; the source of the operator terms is indicated within the material.
Editorial team public email	jakub.wisniewski1@gmail.com — public author contact used for editorial inquiries in the approved configuration.
Affiliate link fact	In the base configuration, there are no active partner links. The commercial labeling applies to the link when a contractual placement appears.
Actual editorial commission	In the base configuration, there is no accrual of partner commission; 3 350 PLN in AFF-PL-01 refers to the contractual settlement scheme.
Paid placement	The basic edition contains no paid placements. Sponsored material, if introduced, receives clear labeling and separate disclosure of the relationship.
Site forms by purpose	One universal project form for edits, questions, and data: name, email, subject, text, acknowledgment checkbox. The recipient is the editorial team; working storage is 90 days from registration.
Comment and moderation rules	In the absence of open comments, corrections and claims are accepted by private letter or form. The text of the request remains in private correspondence.
Editorial site account rules	Editorial reading without an account. Casino login and recovery relate to the operator's account system.
Newsletter settings	Mailing excluded from the service's base composition; request, subscriber, provider, and sending profile are absent.
Analytics Provider	The analytics system is not connected in the project configuration; hosting logs serve operations.
Advertising pixels	There are no advertising pixels in the project configuration; advertising recipients are not included in the data schema.
Cookie categories	The mandatory session category is limited to the form's action. The analytical and advertising categories are disabled.
Provider and hosting location	Project hosting requirement: placement of the working record and backups in the EEA, role-based access, and encryption in transit. The specific provider is determined by the contractual configuration.
Personal Data Officer	Editorial inquiries are handled by the project's publisher via the editorial contact. Game, deposit and KYC data are processed by the operator under its own policies.
Data category and recipient	Name — identification of the appeal by the editorial team. Email — the editorial team's reply. Subject and message — consideration by the editorial team. Service time, result code and URL — hosting operation.
Retention period start event	Working request and postal copy — from registration; technical log — from the event; backup copy — from creation.

Parameter	Meaning
Deleting the working record	The working record and postal copy are deleted after 90 days or upon an applicable request. A documented claim with a legal basis is retained separately for the duration of the basis.
Removal from backup	Backup deletion — on the next rotation up to 30 days from backup creation. Restoration applies the deletion list before granting access.
AI provider, model and region	AI model and external AI provider are excluded from the editorial configuration. Requests are handled by the editorial channel.
Setting up storage with the AI provider	The third-party AI log and the store parameter are absent in the project configuration along with the public AI service.
Audience age and verification	The editorial content is addressed to an audience of 18+. The basic open-reading mode uses an age warning without collecting visitor documents.
Rights to third-party trademarks	BetOnRed and game titles are used to identify the subject of the review. Trademarks belong to their respective rights holders; image licensing is assessed on a case-by-case basis.
Complaint route to the publisher	Complaint about a publication: an email to jakub.wisniewski1@gmail.com with URL, the disputed fragment, the basis, and a contact for a reply. A complaint about a gaming transaction follows the operator's procedure.

Handling of editorial inquiries

Record	Purpose and recipient	Term in the project configuration
Optional name	Identification of the appeal by the editorial board	90 calendar days from registration
Email	Editorial response to the inquiry	90 calendar days from registration
Subject and text	Review of the appeal by the editorial board	90 calendar days from registration
Acknowledgement mark	Action logging on submission	90 calendar days from registration
Postal copy	Editorial correspondence	90 calendar days from registration
Technical log	Site operation and error triage, access for the operations role	14 calendar days from the event
Backup	Account recovery, role-based access	30 calendar days from creation of the copy
Form session cookie	Submission protection	Until the end of the session or 30 minutes of inactivity

The form does not include submission of attachments or personal documents. Project policy provides for backup rotation and application of a deletion list during restoration. Legal holds for a specific claim are maintained separately.

Publisher privacy — Main parameters

Parameter	Meaning
Data controller	Editorial inquiries are handled by the publisher BetOnRed Opinie via the author and the public editorial contact. Game data is handled by the operator.
Data and goals	The name identifies the request, the email is needed for a reply, and the subject and message are for review. The acknowledgment checkbox records submission. Technical records are used for the operation of the site.
Cookies and analytics	Form session cookie for submission protection: until the end of the session or 30 minutes of inactivity. Analytics, advertising cookies and pixels are excluded from the project configuration.
Retention periods	Form and postal copy — 90 calendar days from registration, logs — 14 from the event, backups — 30 from creation, cookie — until the end of the session or 30 minutes of inactivity.
User rights	Requests for access, correction, deletion and objection to processing are accepted via editorial email. To locate a record, the date and address of the original request are provided.
Contact by data	jakub.wisniewski1@gmail.com with the topic "Dane osobowe", recipient — the editorial office.

Publisher Privacy — Additional Settings

Parameter	Meaning
Data transfer	The editorial role receives the form and correspondence, the mail service processes the postal copy, and the operational role receives the necessary technical records. The hosting project requirement is to store working data and backups in the EEA.
Technical records	Access and error logs serve website operation. The term is 14 calendar days from the event; the texts of requests and game data are not included in the logs.
Correspondence data	The postal copy is stored for up to 90 days from registration of the request, with a separate procedure for documented legal holds. Technical logs have their own retention period.
